Solution for Multimedia Education System

CNV MANUAL

Square metal casing ensures the simple yet elegant out look of CNV Series. Designed for the environment of multi-media classroom, CNV series manual screen can be wall mounted or ceiling hanged easily.

Manual Screen with Slow Retraction System

The square shaped metal casing gives the CNV Series screens a simple and precise look. The CNV brackets give users the option of wall mount, ceiling mount or ceiling hand. This model is a perfect fit for various education and government facilities.

Manual Pull-Down Positioning System

- Grandview's self-locking(SL) mechanism allows the screen to be pulled down and have a smooth retraction after releasing.
1. Pull down the handle and hold of the desired point for 2 seconds, the screen will be locked automatically.
 2. Pull down the handle again will unlock the screen and start its retraction.
 3. In order to prevent damage to the casing due to the bottom bar accelerating too quickly, the user needs to hold the handle during retraction.

Manual Screen with Speed-Reduction

A speed reduction component and self-lock component on the same rolling rod makes for a complex and expensive design. Grandview's Slow-Return and Slef-Lock system is integrated and designed as one component and offers three key features.

- Safety
- Self-Lock Limitless Positioning
- Wrinkle Free Screens
