

Liberty Grandview

SKYSHOW SERIES

PROJECTION SCREEN

Solution for High Ceiling Installations

Grandview's Skyshow screen is the world's first large motorized with a built-in self-winding cable system. The Skyshow screen utilizes two heavy duty cables on a separate motorized system that gives it the ability to lower the screen to a maximum of 5 meters. The unique system is designed to be neatly hidden within the casing. At the touch of a button on the remote control, the screen will self adjust to same the desired distance and automatically unfold. When in operation, the casing is lowered and at the same time the screen also begins to lower, creating a theatrical feel. Based on a complex and innovative system, it is designed to be balanced, accurate in adjustment, and has numerous safety and security features.

Skyshow Model A with Canvas Safe-Belt

Global First, invented by Grandview

Projection Screen Solution for Extremely High Installations

Projection Screen with Self-Winding Cable System

Combining the Screen and the Self-Winding Cable System

Three Level Safety Positioning System

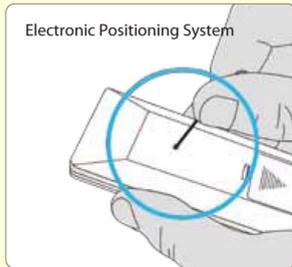

1. Touch-Stop Security Device

The Touch-Stop safety design is set on the cable which can prevent damage to the screen and /or cable system.

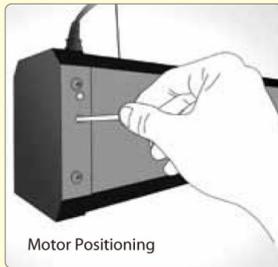

2. Electronic Positioning System

Electronic Positioning System provides users to set the maximum and minimum range easily of the cable system. Pre-set the operation height of the screen via the remote control - it's accurate, fast, safe and reliable.

3. Motor Positioning

The factory setting (adjustable) of the max distance that the screen casing is lowered is 5 meters.

Anti-Dropping Mechanism

This mechanism is designed to prevent the winding cable being broken, a winding motor brake failure, unstable cable installation or a high-altitude fall. This brake mechanism will hold the screen within 20cm in the event the screen falls abruptly like a screen seat belt.

Brake Mechanism

Anti-Collision System

The screen will cut off the electric power and stop when there is an obstacle in the retracting process, ensuring safety for the user and its surroundings. Power will be recovered after removing away the obstacle.

Touch-Stop Security Device for Model B Only

Skyshow Model B with Tightwire

Multi-Control System

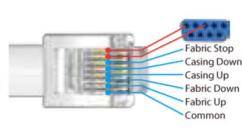

Full-Function Wireless Remote Controller

- Allows controlling the fabric and casing separately.
- Electronic Positioning System can be adjusted after programming

Media-Control

Various control options are allowed, include features like computer/ central control and Synchro Power Control to operate both the projector and screen in sync.

Optional Accessories

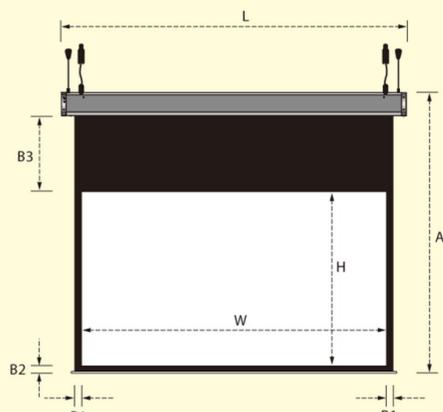

Wall Switch

Plugging right into the EXTCTRL line on screen's integrated controller interface, Manual Control is another extended controller for screen. This manual control does not integrate RS485 or USB connections.

Integrated Wall Switch

Integrating RS485 and USB connections, this adapter plugs right into the screen's integrated control interface. A central control via computer can control the operation of the screen and manual buttons are provided for convenience.
