

GG3

PS FLEXIBLE SOFT

Front Projection Grey Fabric

The GG3 fabric uses a specialized PVC composite with a smooth grey vinyl surface that boosts contrast and reveals shadow detail. Its optimized low-gain design increases color saturation and image depth, delivering more accurate and lifelike visuals when paired with mid/long throw projectors.

- **Enhanced Contrast and Shadow Detail**

0.8 gain eliminates hotspotting and ensures even light reflection
Improves dark-area visibility and overall image depth

- **High Color Accuracy**

97% color reproduction preserves the projector's native color output
Minimal color deviation for natural, detail-rich images without complicated calibration

- **160° Wide Viewing Angle**

Consistent brightness and color across a 160° viewing range
Ideal for multi-viewer spaces such as home theaters and presentation environments
