DY8

DYNAMIQUE SERIES

Ambient Light Rejecting Fabric

DY8 uses imported mid/long-throw optical ALR material combined with five custom optical coating layers that work together to filter ambient light, enhance color performance, and stabilize image quality. It delivers clear, high-contrast 4K visuals in both bright and dark environments. The fabric also supports wide viewing angle and off-axis projection, offering uniform brightness, accurate color reproduction, and a hotspot-free viewing experience across the entire surface.

Fabric Model	Luminance Gain	Visual Angle	Color Restoration	Light Resistance	Projectors	Maximum Width
DY8	0.8	140°	98%	88%	Standard Throw Projector	130"
