ELEGANT SERIES

PROJECTION SCREEN

Manual Screen with Slow Retraction System

Safety

The speed Reduction (SR) and Self-Lock (SL) safety system controls the speed of screen retraction in order to maintain an average rolling speed. The screen retracts slowly and smoothly. For safety purposes the retract time is set to approximately 8 seconds.

Self-Lock Limitless Positioning

The user needs to simply hold the screen at any desired position for second and the screen will lock in place.

Wrinkle Free Screen

The design of the system allows the screen to be positioned at any desired point with virtually no limitations. With this design, when the screen is retracted into the casing the screen from having any unneeded stress points which cause wrinkles. With this feature, all Liberty Grandview screens are wrinkle free.

Optional Handles

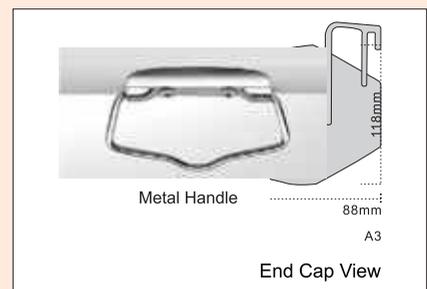

PVC Handle

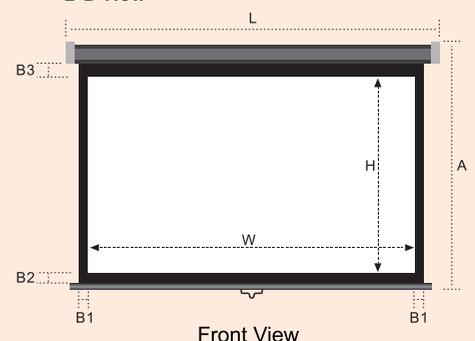

Metal Handle

Installation

The installation can be either ceiling suspended or wall mounted.

Remark:

- Side borders B1 are both 50mm
- To install screen in ceiling, the ceiling hole size could be calculated by the Screen case box size. (Length: +100mm; Height: +60mm; D: +60mm)

liberty GRANDVIEW®

Solution for Multimedia Education system

liberty GRANDVIEW®

CNV MANUAL / ELECTRIC SCREEN

Square metal casing ensures the simple yet elegant out look of CNV Series. Designed for the environment of multimedia classroom, CNV series manual / motorized screen can be wall mounted or ceiling hanged easily, and the motorised screen can be controlled with IR remote.

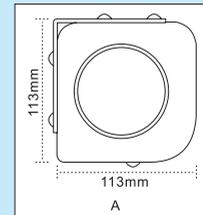

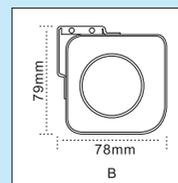

CNV SERIES PROJECTION SCREEN

Manual Screen with Slow Retraction System

The square shaped metal casing gives the CNV Series screens a simple and precise look. The CNV brackets give users the option of wall mount, ceiling mount or ceiling hand. This model is a perfect fit for various education and government facilities.

End Cap View

Manual Pull-Down Positioning System

Grandview's self-locking(SL) mechanism allows the screen to be pulled down and have a smooth retraction after releasing.

1. Pull down the handle and hold of the desired point for 2 seconds, the screen will be locked automatically.
2. Pull down the handle again will unlock the screen and start its retraction.
3. In order to prevent damage to the casing due to the bottom bar accelerating too quickly, the user needs to hold the handle during retraction.

Operation Demonstration

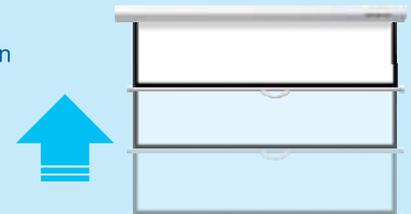

Manual Screen with Speed-Reduction

A speed reduction component and self-lock component on the same rolling rod makes for a complex and expensive design. Grandview's Slow-Return and Slef-Lock system is integrated and designed as one component and offers three key features.

- Safety
- Self-Lock Limitless Positioning
- Wrinkle Free Screens

Operation Demonstration

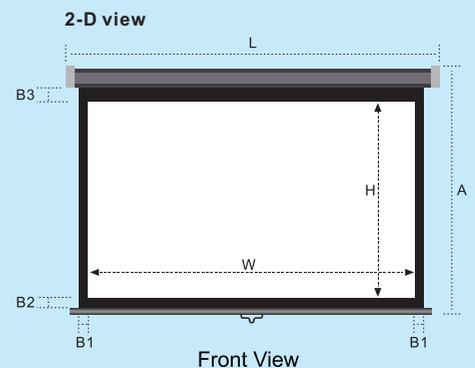

The speed of retracting is equal and the retracting time is approximately 8 seconds.

FIXED FRAME Series

Projection Screen

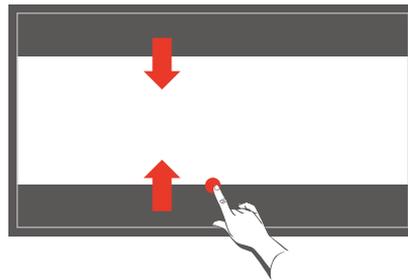

Dual Masking Frame Series

Manual control with no electricity required but just one button!

Dual masking frame screen can serve the needs for different formats in one screen such as 2.35:1, 16:9 and 4:3 with simple and convenient manual control system.

- **Inbuilt Synchro-Masking system**
(for vertical masking only)
With this system the upper masking would move synchronous with the operation on lower masking.
- **Slow Retraction**
Inbuilt with slow retraction system, the masking can be retracted slowly automatically.
- **Easy Operation**
The manual button is set at a convenient operational height for easy operation.
- **Easy Installation**
Equipped with rapid installation bracket system, the aluminum alloy frame with velvet wrapped is easy to be assembled and installed

Unique Movable Masking System (For Vertical Masking Exclusive Use)

One side pulled, both sides retracted

Horizontal Dual Masking Frame Screen

For the projector with 2.35:1 chips, the horizontal masking system maximize the 2.35:1 viewing area while including 16:9 and 4:3 format

Vertical Dual Masking Frame Screen

For projector with 16:9 original and project 2.35:1 image with anamorphic lens, the vertical masking system can match both 16:9 and 2.35:1 format.

FIXED FRAME Series

Fixed Frame Screen

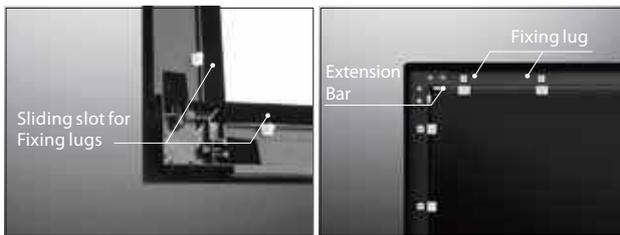

Large-Flat Permanent Fixed-Frame Screen

Special Flat-Panel TV

Grandview's Large-Flat Permanent Fixed-Frame screen is a solution for the size limitation problem that comes with Traditional TV. The Permanent Fixed-Frame brings home the big screen theatre experience. Setting itself apart from normal screens, Grandview's Permanent Fixed-Frame screen features a plane positioning design that ensures equal tension from every side which makes the projection

surface as flat as can possibly be. The optional perforated screen material features the most advanced perforation technology that ensures both picture and sound is showcased at an optimal level. Grandview Permanent Fixed-Frame screen is the enthusiast's choice for use in a dedicated application.

■ 4 Sided Tension Design

The steel tension bars along with the fixing lugs stretch and tighten the screen fabric for it to be completely flat and wrinkle-free. The tension can be adjusted to ensure an evenly tensioned surface.

■ One Button Uninstall

By pressing the One button uninstall located under the install brackets, the whole screen can easily be taken down for cleaning.

Prestige Fixed Frame Screen Structure

- * Aluminum alloy frame wrapped in velvet.
- * 45° corner connecting bracket fits perfectly and Easy to install
- * 80cm Bevelled Frame
- * Used for sizes 150" and Below

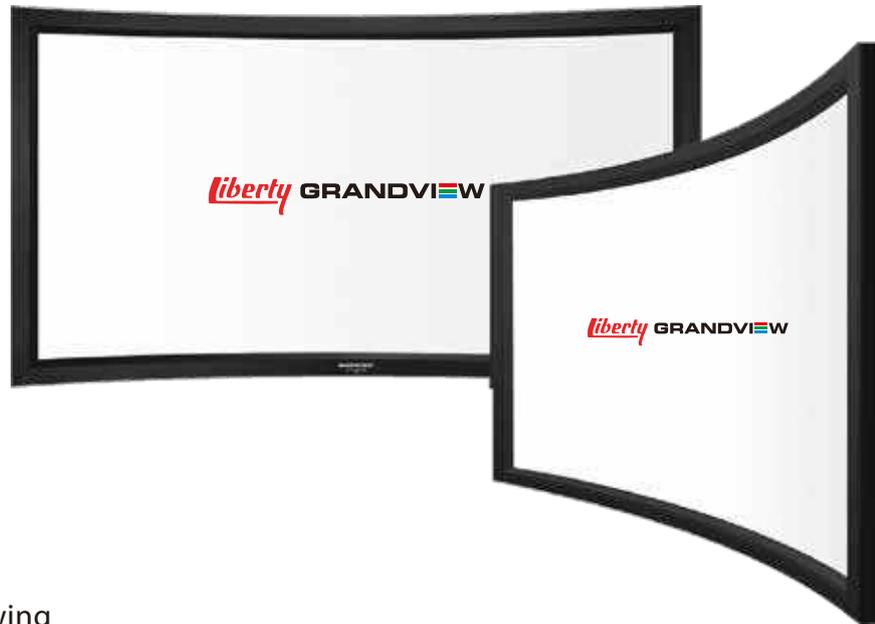

Ultimate Fixed Frame Screen

- * Aluminum alloy frame wrapped in velvet.
- * Corner Bracket are fixed by screws which ensure the connecting bracket is firm and rigid
- * 100mm Bevelled Frame
- * Used for sizes 150" and Above

FIXED FRAME Series

Projection Screen

Curved Frame Screen

Curved Permanent Fixed-Frame Screen

Designed for Optimal Viewing

Grandview's Large-Flat Permanent Fixed-Frame is designed for the most precision and enthusiast oriented applications. It features an advanced aluminum structure with the goal of creating an image made to fit the natural curve of the human eye. The Design is created

to eliminate problems caused by different distances between the projector and the screen. This screen brings high definition viewing to a high level.

■ 4 Sided Tension Design

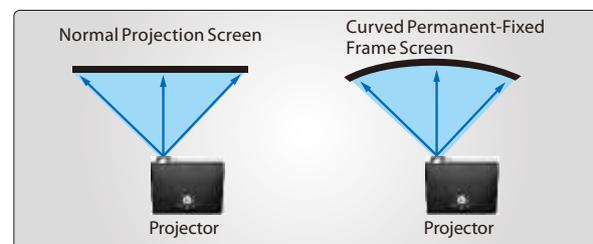

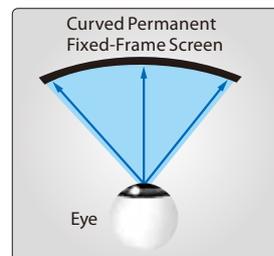

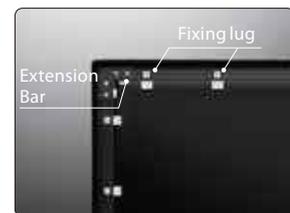

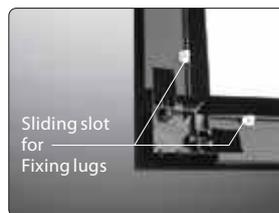

The steel tension bars along with the fixing lugs stretch and tighten. The screen fabric is to be completely flat and wrinkle-free. The tension can be adjusted to ensure an evenly tensioned surface.

■ More Accurate, Realistic; A Feast for Your Eyes

Based on the feature of the eyeball to achieve high definition, and balance the focus of the screen with the purpose of achieving a perfect effect between screen image and visual experience.

■ More Uniform, Detailed, Taking you into your Film World

Based on the projector's sphere to make the image uniform and perfectly focused.

Recessed-ceiling Series

- Aluminum alloy casing with stability and low weight.
- Recessed design integrated with ceiling decoration.
- Suitable for all types of ceilings.

Recessed ceiling screen features the "Separated Casing" patented technology that reduces noise and vibrations. This helps to eliminate the common noise problem caused by the friction between the screen casing and ceiling. This exclusive technology ensures that while the screen is completely hidden providing a seamless look there is no compromise in quality. This screen is designed to be recessed into the ceiling and is an ideal hidden solution for installations such as home cinema, office and conference rooms. The sturdy case boasts an easy to install yet functional design. The largest seamless size of this screen is 200"(4:3) or 200"(16:9). Tab-tension motorized and standard motorized applications are available in this recessed-ceiling design.

Revolutional Noiseless Solution

Separated Casing Patented Technology

Patent No: ZL200920238695.1

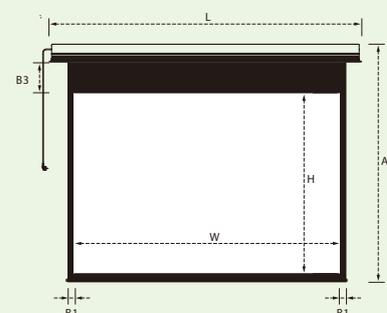

Specification (CB-MICKxxx)

	180	3984×2241	2782	300	4474×161×170	48.5	160W

Remark:

1. Recessed-Ceiling series, under 120" size with double ornament board, 120" or above the size with single ornament border.
2. For Tab-Tension series if recessed installation was necessary, ensure the oblong groove's Length, Height, Depth is separately more than 100mm, 60mm, 60mm of the product dimension. For well covering the groove with ornament board, Length and Depth need to be separately less than 10mm of product dimension if the groove's Height is over 250mm.

Tab-tension Series

Tubular Motor

- * Smooth Operation
- * Accurate Positioning
- * Low Noise ($\leq 45\text{dB}$)
- * Durable

Tab-Tension Motorized Screen

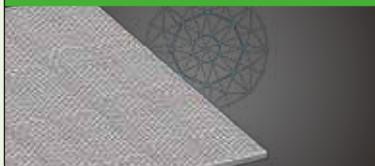

- PS Series flexible HD fabric provides high quality images.
- Tension system along with the adjust knob design ensures the last long flatness.
- Floating mounting brackets suits for all types of installation environments.

An unique knob/auto tension adjustment system

With a unique knob/auto tension adjustment system, the screen surface is well tensioned at every point to ensure a picture experience. The tool-free system ensures that wrinkles and "V" waves are eliminated.

PS HD flexible fabric which features a unique layer of special diamond patterns

This screen features the PS HD flexible fabric which features a unique layer of special diamond patterns on the surface specifically designed to bring out the best from the projector and enhance picture quality and color. With its ability to maximize and reflect high resolution images, this fabric brings out the best in high definition feeds.

Control Options

In-Line Switch

In-Line Switch is the standard control option for motorized screen. No installation is required and the controls are simple to use.

HD THEATER Series

Projection Screen

Tab-tension Series

Integrated Tab-Tension Motorized Screen

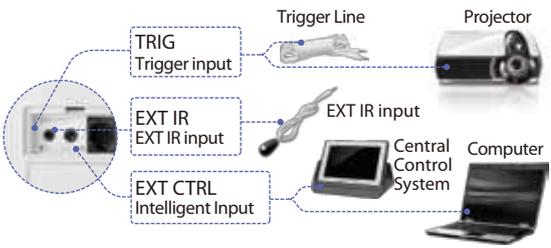

- Aluminum alloy casing with stability and low weight.
- Floating mounting brackets suits for all types of installation environments.
- PS Series flexible HD fabric provides high quality images.
- Tension system along with the adjust knob design ensures the last long flatness.
- Equipped with intelligent control system.

Recessed-Ceiling Tab-Tension Screen

- Aluminum alloy casing with stability and low weight.
- PS Series flexible HD fabric provides high quality images.
- Tension system along with the adjust knob design ensures the last long flatness.
- Designed with Grandview's patented "Casing Separated" Technology.
- Recessed design integrated with ceiling decoration.
- Equipped with intelligent control system.

Control Options

<p>1 IR Remote Control</p> <p>The fabric drop and retract and micro control can be achieved by controller. The remote distance is 8 meters.</p> 	<p>2 Cycle-Switch</p> <p>The button under the casing close to the power line is the Cycle Switch button.</p> 	<p>3 Central Control Adaptor</p> <p>Plug into the EXTCTRL slot via 6P6C for a Central Control Adaptor. Various cable lengths can be used for different installation situation.</p> 	<p>4 Multi-Control Options</p> <p>EXT-CTRL can be connected by either a wall-switch or connected to the Central Control Adaptor for remote usage.</p> 
--	---	---	---

Optional Control

Central Control Adapter

Forextendedscreencontrolandfunctionally,the central control adapter is available. Integrating RS232 and USB connectors, this adapter plug right into the screen's integrated control interface. A central control via computer can control the operation of the screen and manual buttons are provided for convenience.

Power Synchro Relay

RF emitter put into the projector's power cord and RF sensor plug into the screen end cap's EXT IR interface, to realize the screen's up and down sync with the projector's off and on.

Remark: 1. Recessed-Ceiling series, under 120" size with double ornament border, 120" or above the size with single ornament border.
 2. For Tab-Tension series, if recessed installation was necessary, ensure the oblong groove's Length, Height, Depth is separately 100mm, 60mm, 60mm more than the good's size. For Recessed Tab-Tension series, please ensure the oblong groove's Height is over 250mm while the Length and Depth is separately 10mm less than the good's size, so the flap can cover up the groove perfectly.

LARGE STAGE SERIES

PROJECTION SCREEN

Majestic Visual Experience

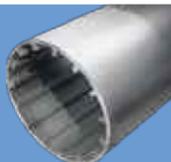

Grandview large stage motorized screen is wisely applied to venues such as the theatre halls, large performances, auditoriums, and etc. For the traditional large screens that are with fixed tension structure, they are strict in requirement of raw materials and workmanship cause the viewing area is usually very huge, and the surface tension is always insurmountability which makes the screen surface cannot remain flat.

Revolutionary Design

- Quieter and smoothly operation
- Convenient Positioning
- Low-Noise(≤ 45dB)
- Durable and long lasting

- Light weight and high-strength
- Fixed and straight in long terms
- Level camber is less than 0.05%

Main Cover

Motor Rack

➔

Screen Fabric Rod

Position Adjustment

Screen fabric rod

- **Large torsion tubular Motor**
The screen will utilize the 80N large torsion tubular motor which is noiseless and convenient to fix and adjust.
- **Extra large diameter and high-intensity aluminum alloy shaft**
Extra large diameter diameter and high-intensity aluminum alloy shaft that level camber is less than 0.05%, it can remain fixed and straight within 10 meters span and the distortion caused by the suspended installation of the large shaft can be effectively relieved.
- **Extremely fast and convenient to change the motor**
Simply open the main cover, remove the existing motor and insert the replacement. This design allows the screen to easily modified and have an extended product life cycle.
- **Screen flat adjustment system**
The fabric V-shaped wrinkles and fabri static can be effectively eliminated by adjusting the fabric rod.

Large Stage Motorized Screen with Wooden Casing

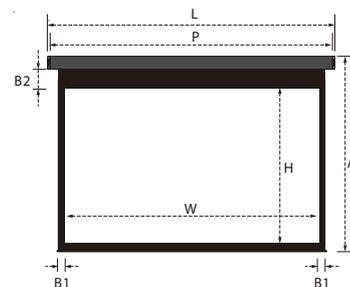

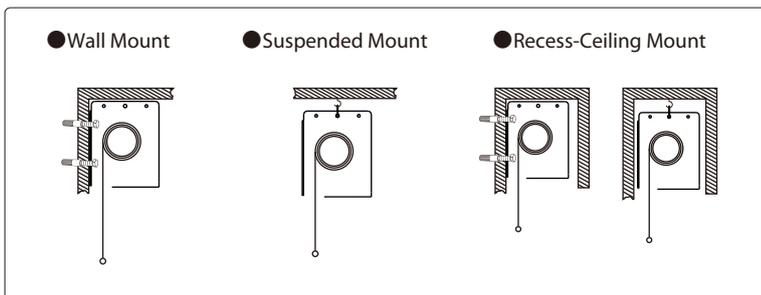

450" ~500"

■ The metal brackets match with high-intensity adhesion wooden casing and penetrated screws, which ensures the safety of the suspended installation.

■ With high-strength aluminum alloy roller (250mm diameter)

Remark:

1. Large-Stage Screen's casing needs 200mm top installation distance, 300mm left repair space for motor replacement.

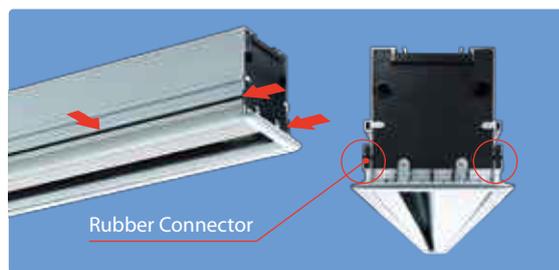

2. Standard side borders B1 and bottom border B2 are 80mm for model MA; Standard Side borders B1 and bottom border B2 are 50mm for model MB.

Large Stage Recessed Ceiling Motorized Screen

300"~400"

- With aluminum alloy casing box which can reduce the weight effectively.
- With a 200mm diameter high-intensity roller.
- With hidden design and fashion appearance, it makes the whole decoration more harmonious.

Unique patented technology

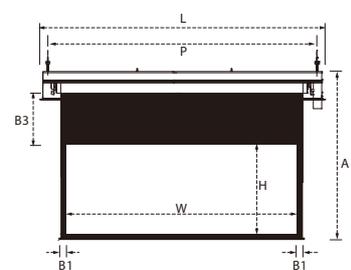

——'Separated Casing' patented technology design

This screen features the 'Separated Casing' patented technology that reduces noise. This helps to eliminate the common noise problem caused by the friction between the screen case and ceiling.

Control Options

● **In-Line Switch**
Standard control provides stable and suitable installationas

● **Wireless Remote(optional)**
The fabric adjustment and micro control can be achieved by controller. The remote distance is more than 25meters.

liberty GRANDVIEW

SKYSHOW SERIES

PROJECTION SCREEN

Solution for High Ceiling Installations

Grandview's Skyshow screen is the world's first large motorized with a built-in self-winding cable system. The Skyshow screen utilizes two heavy duty cables on a separate motorized system that gives it the ability to lower the screen to a maximum of 5 meters. The unique system is designed to be neatly hidden within the casing. At the touch of a button on the remote control, the screen will self adjust to same the desired distance and automatically unfold. When in operation, the casing is lowered and at the same time the screen also begins to lower, creating a theatrical feel. Based on a complex and innovative system, it is designed to be balanced, accurate in adjustment, and has numerous safety and security features.

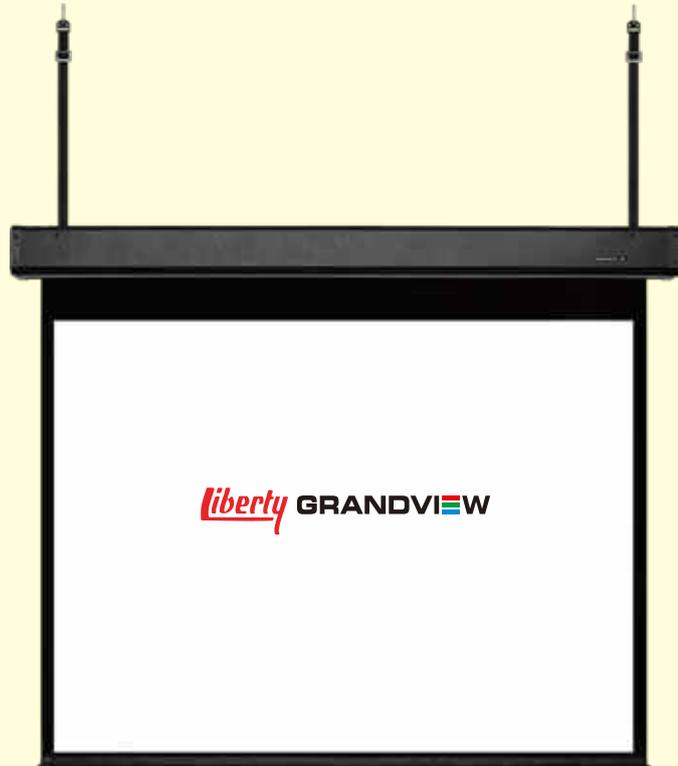

SKYSHOW SERIES PROJECTION SCREEN

Global First, invented by Grandview

Projection Screen Solution for Extremely High Installations

Projection Screen with Self-Winding Cable System

Combining the Screen and the Self-Winding Cable System

Skyshow Model A with Canvas Safe-Belt

Three Level Safety Positioning System

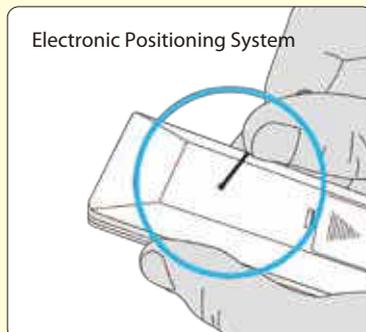

1. Touch-Stop Security Device

The Touch-Stop safety design is set on the cable which can prevent damage to the screen and /or cable system.

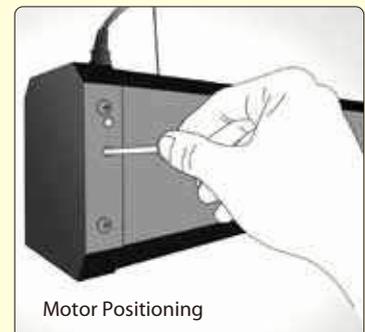

2. Electronic Positioning System

Electronic Positioning System provides users to set the maximum and minimum range easily of the cable system. Preset the operation height of the screen via the remote control - it's accurate, fast, safe and reliable.

3. Motor Positioning

The factory setting (adjustable) of the max distance that the screen casing can be safely lowered is 5 meters.

SKYSHOW SERIES

PROJECTION SCREEN

Skyshow Model B with Tightwire

■ Anti-Dropping Mechanism

This mechanism is designed to prevent the winding cable being broken, a winding motor brake failure, unstable cable installation or a high-altitude fall.

This brake mechanism will hold the screen within 20cm in the event the screen falls abruptly like a screen seat belt.

Brake Mechanism

■ Anti-Collision System

The screen will cut off the electric power and stop when there is an obstacle in the retracting process, ensuring safety for the user and its surroundings. Power will be recovered after removing away the obstacle.

Touch-Stop Security Device for Model B Only

Multi-Control System

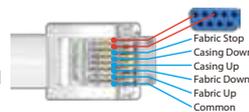

Full-Function Wireless Remote Controller

- Allows controlling the fabric and casing separately.
- Electronic Positioning System can be adjusted after programming

Media-Control

Various control options are allowed, include features like computer/ central control and Synchro Power Relay to operate both the projector and screen in sync.

Multi-Function Control Diagram

Standard Accessories

Remark:

1.Screen with A End Cap Model,B1 and B2 black-drop are same as 80mm. Also, screen with B End Cap Model, B1 and B2 black-drop are same as 50mm.

PORTABLE Series

Projection Screen

Motorized Floor-Up Series

The world's first Portable Motorized Floor-Up screen

Installation free and movable, to easily realize automated Portable projection screen, can satisfy mobile display or installation free circumstance.

■ Anti-Clamping Mechanism

Appearance aside, this screen also offers the safety and usability features expected from a Grandview Screen. For example, and integrated anti-clamping mechanism prevents injury or damage to the screen when an object interferes with the screen during its operation.

■ Inbuilt Tool Box

A built-in tool box contains all the necessary accessories such as a remote control, power cord, and infrared extension receiver.

■ Motor System

The low noise durable motor allows the dual diamond-shaped structure to rise. The design of the dual diamond-shaped supports working in perfect sync with the motor's power distribution created a balanced and sturdy support for the screen. With this synced system, it helps prevent any folding creasing or twisting of the screen when use.

■ Control Options

- Infrared Remoted Control
The fabric adjustment and micro control can be achieved by controller, the remote distance is 8 meters.
- External Infrared Sensor
Infrared receiver increases the remote range of motorized screens.
- Manual Cycle-Switch

PORTABLE Series

Projection Screen

Portable Pull-Up Series

Three Designs More Safety Higher Portability

Intelligent Interlock

The design of the intelligent interlock ensures the screen is fully secure during use and transportation. When the support bar is lifted, the case will be automatically unlocked and allowing the screen to be pulled up. When the screen is retracted back in the casing and the support bar is down, the case will automatically be locked. This innovative safety feature is easy to use and standard for all size.

Hang with lock structure

The top cap with handle is a hang with lock structure, the screen can be easily pull up and take down with it, as a hang part set close to the support bar while pulling up, will be locked with the casing as the screen has been taken back.

Grandview Patented Design

Hang with Lock Structure

Patented No.: ZL200810219598.8

Level Adjustment Knob

During use, two support legs which are otherwise hidden conveniently slide out from under the casing. The support legs come with height adjustable floor stands for use on uneven surfaces. For additional vertical stability, the support bar comes with an additional height adjustable floor stand.

Portable Self-Stand Series

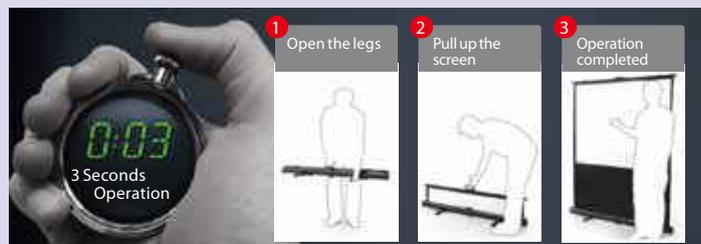

X -PRESS Y -PRESS Z -PRESS

Lighter and Faster Than Ever

Grandview's X-press series pull-up screen uses patented technology that allows it to be setup and taken down with minimal time and effort.

- The lightest compare with similar product, 70 inches only 7kg.
- Single button locking mechanism easy to carry and operate, fully pull up only in 3 seconds.
- The self-supported arms allows any screen position to be set.

Grandview product

These self-supported arms of Grandview's CyberX-Press series screens are specially designed to sustain pressure from any angle, thus allowing the screen to extend and retract freely without limitations.

Othes Product

The supported arm has a stress limitation could cause the screen to be suddenly collapsed while the screen is retracting back.

Grandview Patented Design

Single button locking mechanism

PORTABLE Series

Projection Screen

U-Work Series

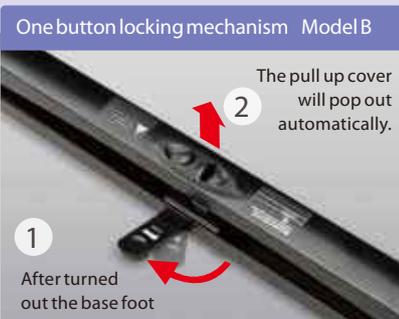

The perfect solution for table-top projector display

As the portable LED projector and mobile phones with projection capabilities are gaining popularity, the U-Work screen offers an excellent viewing experience compared to the traditional laptop and brings customers a better viewing experience for portable business. The latest design of the U-Work screen with the self-stand base foot allows the screen to be stopped at any desired position.

- Extreme portability - the 40"U-Work screen only weighs 1.3KG.
- One button locking mechanism allows the screen to be unlocked automatically when turning out the base foot.
- Using the self-standing arm, the screen can be stopped at any desired position.

U-work A
40"~60"

U-work B

SUPER MOBILE Series

Projection Screen

Fast Fold Screen

Ideal for Movable Presentation

- The screen is convenient to sturdy and easy to carry, benefited from its professionally designed aluminum alloy frame and the solid corner design by helping increase the rigidity of the overall structure.
- Only 10 minutes is needed to extend or fold a screen even is 200" size
- Fixing by multiple points on each frame bar, it ensures the screen to be installed flat and wrinkle-free, also the innovative fold-and-lock mechanism helps making setup and take down easy
- With standard flight case option, the screen is easy to

Professional Viewing Quality

The screen is fixed by multiple points on each frame bar. This ensures the screen will be installed flat and wrinkle-free.

Innovative Design

The innovative fold-and-lock mechanism helps making setup and takedown easy. It also ensures the frame is firm and secure during use. The solid corner design adds safety by helping increase the rigidity of the overall structure.

Practical, Durable and Portable

The professionally designed frame is sturdy yet light and easy to transport. All pieces including the frame, support and screen fabric are designed to fit into one case which greatly saves space for transportation.

SUPER MOBILE Series

PROJECTOR LIFT Series

GPCK Series

Recessed-Ceiling Motorized Projector Lift

Perfect Recessed & Easy Operation

With engineering aesthetics design, GPCK Recessed-Ceiling Motorized Projector Lift can integrating into indoor decoration perfectly.

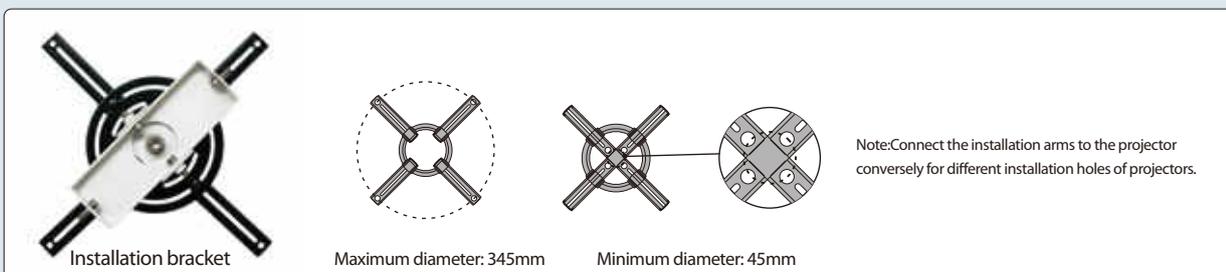

GPCK-MA Series

Recessed Ceiling
Motorized Projector Lift (Sealed in)

- GPCK-MA1600
- GPCK-MA1600L
- GPCK-MA2700
- GPCK-MA2700L
- GPCK-MA4600L

- Maximum Weight Capacity: 15Kg
- Power: 170W
- Voltage: 220V/50Hz
- Wireless FM: 868MHz

Scope for installation (Installation hole of projector)

PROJECTOR LIFT Series

GPCK-MA Series 8 Features

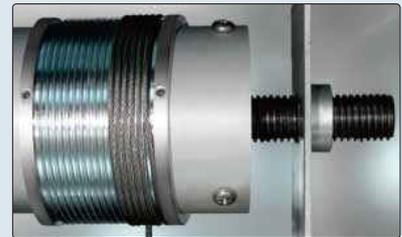

1 Dual Positioning System

Dual Positioning System provides safety and convenience to users. The safety positioning of motor is set by factory, and the height of stopping can be adjusted automatically by electric positioning.

2 Automatic Balancing Mechanism

Automatic Balancing Mechanism ensures the dragline and suspending cage vertically when extending or retracting, avoid any digression or noise caused by the slant of the dragline.

3 Brake Mechanism

The Brake Mechanism is designed when the dragline is broken, the motor brake is out of control or the steel cable loose accidentally, the safety device will operate automatically and prevent the falling of case and improve the security in high-ceiling condition.

4 High-Strength Aluminum Linkage

High-Strength Aluminum Linkage is die-casting and with excellent texture, high-strength and rustproof, very light and it can reduce the lift-weight and keep the balance.

5 Complete Protection

Complete Protection prevents the projection equipment against the impact of external environment and avoid the leakage of the cool air.

6 Ornament Baffle

Ornament Baffle matches perfectly with different types of ceiling, when extending the case, it may completely cover the hatch that occurs.

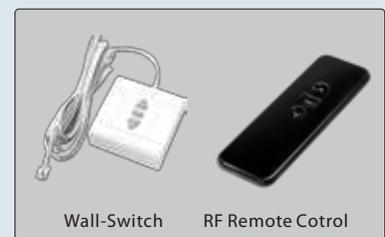

7 Cable Management

Cable Management which is allocated for the users to put power cord, VGA, RGB or HDMI cables inside, easily bend and stretch customized size are available.

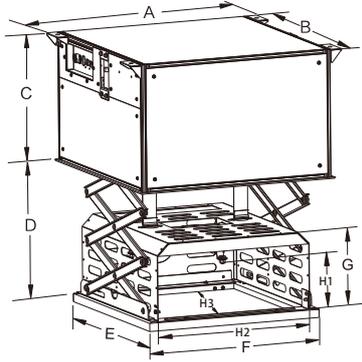

8 Multi-Control Systems

Multi-Control Systems are available (RF Remote Control, RS232/485, Wall-Switch)

GPCM Series

Projector Ceiling Mount

GPCM-D3040
GPCM-D4060

GPCM-E3540
GPCM-E4560

GPCM-F400

*Applicable distance of projector holes:

Model D: 40~310mm
Model E: 45~345mm
Model F: 50~365mm

*The length of mounting bracket:

300~400mm (GPCM-D3040)
400~600mm (GPCM-D4060)
350~400mm (GPCM-E3540)
450~600mm (GPCM-E4560)
504~684mm (GPCM-F400)

*Maximum weight: 20Kg

Features:

*Wires collection
*Adjustable main bar
*Horizontal angle: $\pm 8^\circ$
*Vertical angle: $\pm 15^\circ$
*Horizontal rotation adjustment: 360° (Only for Model E)

Model D Mounting Bracket

Model E Mounting Bracket

Horizontal rotation adjustment: 360°

GPCM-B Series

Projector Ceiling Mount

GPCM-B200
GPCM-B300
GPCM-B400

*Applicable distance of projector holes:
Length ≤ 280 mm,
Width ≤ 255 mm

*The length of mounting bracket:
200/300/400mm

*Maximum weight: 25Kg

Features:

*Wires collection
*Adjustable main bar
*Adjustable angle:
Front and back direction:
forward 30° , backward 3°
Left and right direction: 3°
*Horizontal rotation adjustment: 360°

GPCN Series

Projector Ceiling Mount

GPCN-D200
GPCN-D3040
GPCN-D4060

GPCN-E200
GPCN-E3540
GPCN-E4560

*Applicable distance of projector holes:

Model D: 40~310mm
Model E: 45~345mm

*The length of mounting bracket:

(D Model is the same with E Model)
250mm (GPCN-D200)
350~400mm (GPCN-D3540)
450~600mm (GPCN-D4560)

*Maximum weight: 10Kg

Features:

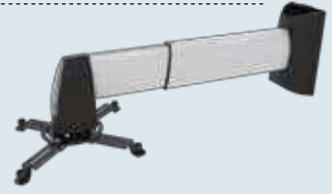

*Suitable for ceiling sloped angle less than 15°
*Wires collection
*Adjustable main bar (except for GPCN-E200)
*Horizontal angle: $\pm 8^\circ$
*Vertical angle: $\pm 15^\circ$
*Horizontal rotation adjustment: 360° (Only for Model E)

GPCP Series

Projector Wall Mount

GPCP-D4060
GPCP-D6090
GPCP-D90150

GPCP-E4060
GPCP-E6090
GPCP-E90150

*The length of mounting bracket:

(Model D is the same with Model E)
420~600mm (GPCP-D4060)
620~900mm (GPCP-D6090)
920~1500mm (GPCP-D90150)

*Maximum weight:

(Model D is the same with Model E)
20Kg (GPCP-D4060)
20Kg (GPCP-D6090)
15Kg (GPCP-D90150)

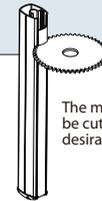

Features:

*Suitable for ceiling sloped angle less than 15°
*Wires collection
*Adjustable main bar (except for GPCN-E200)
*Horizontal angle: $\pm 8^\circ$
*Vertical angle: $\pm 15^\circ$
*Horizontal rotation adjustment: 360° (Only for Model E)

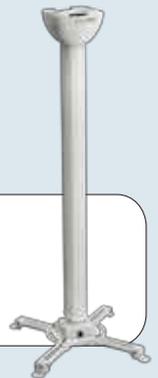

GPCQ Series

Projector Mounting Bracket

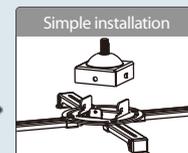

GPCQ-F680

The main bar can be cut by user into desirable height.

Model F Mounting Bracket

GPCM-C Series

Projector Ceiling Mount

GPCM-C200
GPCM-C300
GPCM-C400

*Applicable distance of projector holes:
1. Length ≤ 205 mm,
Width ≤ 160 mm.
2. With omnipoten arm can extend to:
Length ≤ 205 mm,
Width ≤ 255 mm

*The length of mounting bracket:
200/300/400mm

*Maximum weight: 25Kg

Features:

*Wires collection
*Adjustable main bar
*Adjustable angle:
Front and back direction:
forward 30° , backward 3°
Left and right direction: 3°
*Horizontal rotation adjustment: 360°

AV-VISION
EQUIPMENTS (INDIA) PVT. LTD.

Fabric Collection

Matte White Fabric

Grandview offers different types of fabric that each have their own features and specifications. Grandview's matte white fabric is composed of 4 different layers including a sheet of weaved fiberglass which helps stop static electricity and most importantly prevent the loss of the light, making it compatible with virtually every projector. Grandview screen fabrics are designed to be fire, water and mold resistant and can be cleaned if necessary. The outside surface of the matte white screen has microdots that are made with PVC technology that helps with creating the best possible reflection. New

advances in screen technology help keeping our matte white screens flat and retain its shape and effectiveness over longer periods of time.

To cater to customers of all install environments, Grandview offers a light grey material which features a lower 0.8 gain and a viewing angle of 140 degrees. This material will help enhance contrast levels for applications where the focus is less on gain levels and more on contrast.

Fabric Features

■ Last-long Flatness

With four layer structure including Fiberglass, Stretchness less than 1% which ensures the last-long flatness.

■ Sophisticated Images

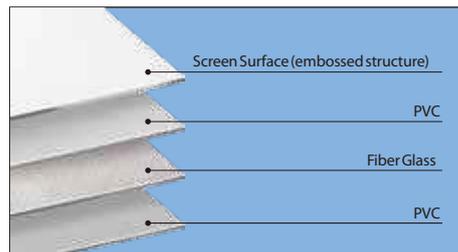

Engraved with optical microgroove on the surface, with resolution more than 125 line pairs per mm, which ensures the sharpness of the projected images.

■ Color Accuracy

The reflection light are evenly distributed with less than 60K difference between incident angle and reflection angle.

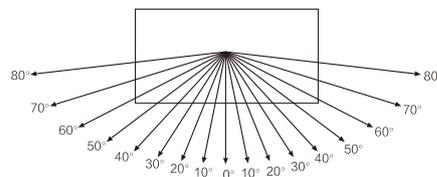

■ Wide Color Range

With high contrast processment, while maintaing the color accuracy and color range is widely presented to provided a more vivid image.

The weaved fiberglass layer of the fabric is used as a backing or backbone of the entire screen structure. With this layer, Grandview's Matte White fabric have a stretching rate of less than 1% and a much longer life span than ordinary material. The fiberglass backing will not cause any wrinkling or waves due to changes in temperature, humidity or drag forces.

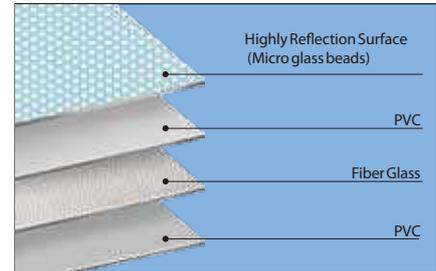

Matte White Fabric Viewing Angle range 160°

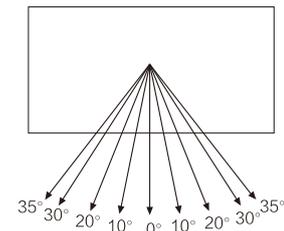

Fabric Collection

Glass-Bead Fabric

Grandview glass-beaded screens feature a composite structure that is composed of four layers. It features a backing that is made of fiberglass and is covered with a dual layer PVC material. The surface is covered with micro glass beads with diameters ranging from 0.12mm to 0.15mm. The glass-beaded surface is highly reflective providing users with a reflection that is high in brightness. With a narrow high reflection angle, the gain can be up to 2.5 times or projector's output.

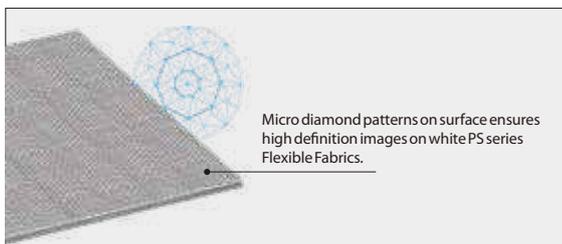

Glass-Beaded Fabric Viewing Angle range 70°

PS Series Flexible Fabrics

The PS series flexible fabrics are made of a specially designed PVC material. The surface features microgrooves that help eliminate light ripples and reduce glare. The PS series is available in white, high contrast grey, high definition (HD) white and rear

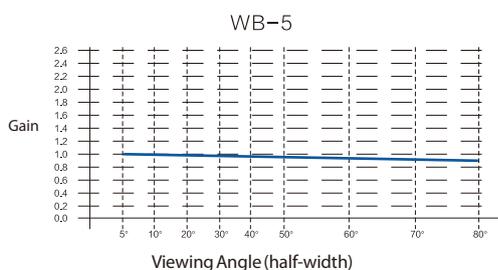

projection surfaces. These fabrics feature rich color and high contrast imagery, perfect for high quality wide angle viewing purposes.

Front Projection PS series Flexible Fabric

PS series White Fabric WW-3

Featuring a non-translucent back layer WW-3 fabric prevents light from penetrating through the screen. As this prevents any loss in picture quality and maintains the image as accurate as its projection, the fabric is used on numerous screen models. The ultra wide 160 degree viewing angle allows viewers to enjoy perfect images within the range.

Fabric Collection

PS series High Definition (HD) White Fabric WB-5

The WB-5 fabric has a similar base features as the WW-3 fabric but features a unique layer of specially designed micro diamond patterns on the surface. This unique features is designed to enhance picture quality and color while reducing any glare and imperfections. Designed with the ability to reflect the most vivid and clear high resolution images, this fabric will bring out the best in all high definition feeds.

PS series Grey Fabric GG-3

When compared to WW-3 fabric, the GG-3 fabric has a special compound material that features more smooth surface which can effectively compensate for dark colors (e.g. black and grey color). This design is purposely to reduce color gains but to improve high contrast and color richness for higher quality vivid images. When paired with a high lumen or high contrast DLP or LCD projector, viewers will experience images that have the best contrast levels brought out.

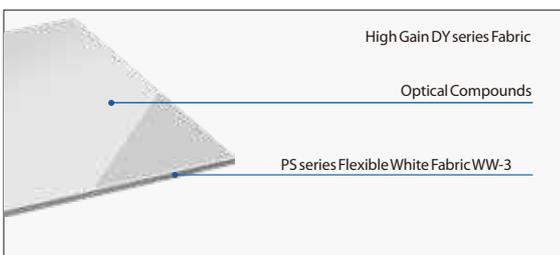

Rear Projection PS series Flexible fabric RE-3

The RE-3 fabric can be used on many different applications. It's constructed of materials that allow it to have a high level of transparency. It features high contrast images while having a high resistance to ambient light. The smooth surface ensures a flat picture that is realistic yet brilliant in color richness. The flexible nature of the screen allows it to be easily foldable and stored. Portable and Frame screens utilize the best benefits of the RE-3.

High Gain DY series Fabric

Based on coating special optical compounds on the projection surface of WW-3 fabric

Fabric Collection

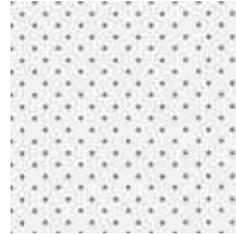

Perforated Fabric Series

High Gain DY perforated fabric series

Gain: DY14(AT):1.4 DY16(AT):1.6

Sound attenuation: The difference in sound attenuation between 8kHz&12.5kHz and 500Hz is less than 1dB and 1.5dB.

Color rendition: As a pure white background feature, the different color temperature between reflected light and incident light is under 60K. It can completely avoid a dark image.

High Gain DY fabric series

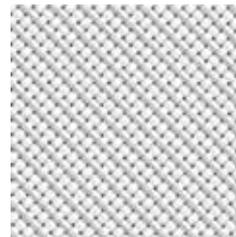

Perforated Weave Fabric AT-6

Fabric Width: 1.7m

Gain: 0.9

Perforated Area:7%

Perforated Weave Fabric

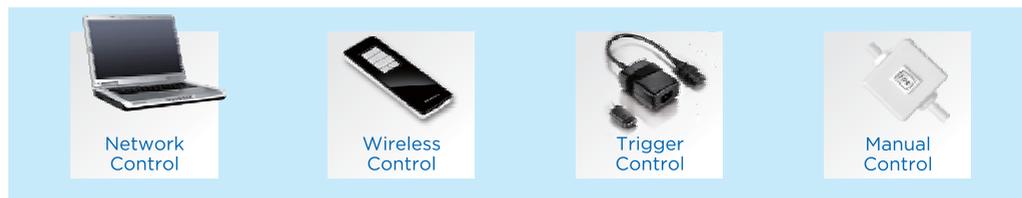

Perforated Fabric

Grandview perforated screen material features the most advanced perforation technology that ensures both picture and sound is showcased at an optimal level.

High Gain DY Fabric (Perforated Fabric)	High Definition White Fabric (Perforated Fabric)	Perforated Weave Fabric
Gain: 1.1/1.6 Holed Diameter: 0.5/0.8	Gain: 1.0 Holed Diameter: 0.5/0.8	Gain: 0.9 Holes Area: 7%

Control System

Network Control

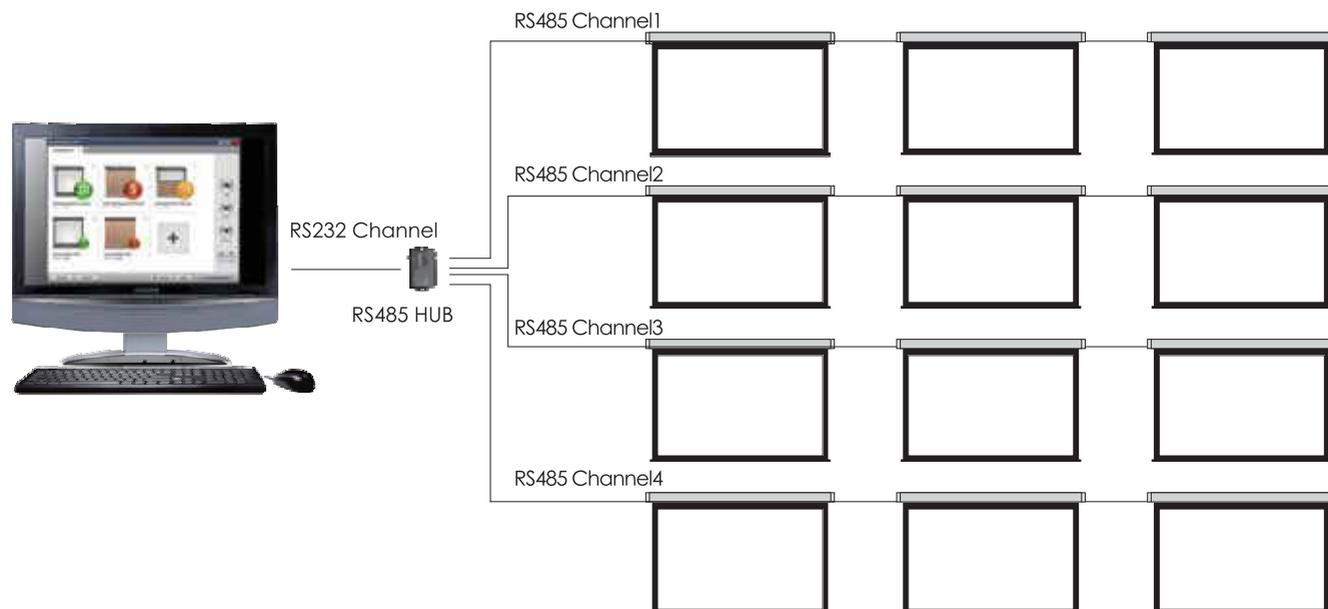

Grandview's control software is easy to use and can connect multiple projection screen with various systems. It is designed to be user-friendly, easy to install, and compatible with a wide range of control options and software making it ideal for multi-media conference rooms, classrooms, conference centers, and etc. All of Grandview's integrated screens made in 2011 include this feature.

- ◆ Easy to Install : User simply needs to download the control software to the computer and connect to the screen via a network cable.
- ◆ Highly Efficient : The software can automatically search for connected screens and organize them in groups or the user can set the code for each screen to define controlling a single or multiple screens.
- ◆ Wide Range : The longest range of control possible is up to 1200 meters.

Control Interface

1. More templates for different applications.
2. Users can monitor the status of single or combined screens in specific applications.
3. Users can add configured screens to a desired area : It can be a single or multiple screens.
4. Users can re-group single or grouped screens (by pressing "Group")
5. Users can manually delete screens from inside a desired area (by pressing "Delete")
6. Users can control the indicated screen or grouped screens in the desired area to up, stop, down or micro-adjust.
7. Users can receive detailed information in a desired area.
8. Press the "Setting" button to configure the System Setting, Preference Setting and Code Setting.
9. Press the "Help" button for help and to determine the version of the system.

Control System

RF to IR Converting System (FM868MHz)

RF to IR Converter Set (868M-2R)

RF-IR Converter

Wireless Remote Controller

Plug in the RF-IR Converter into the external slot in the motorized screen.

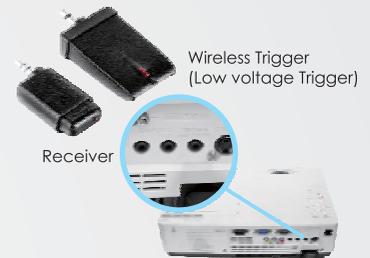

This product is compatible with IR controlled motorized screens which is recess installed in the ceiling. It can convert the screen into a RF controlled receiver when plugged in.

Wireless Trigger System (FM868MHz)

Low voltage wireless trigger 12V-WR

Plug the wireless trigger into the "TRIGGER" slot of the projector and the wireless RF-IR converter into the screen to create a synchronized control system. When the projector is turned on, the projection screen will automatically lower and when the projector is off, the projection screen will automatically retract.

Power Source DC3V (Cr2430 x 1)

Power Synchro Relay IPS-868M

Connect the Power Synchro Relay to the power cord of the projector and the RF-IR converter to the screen to create a synchronized control system. The Power Synchro Relay is designed for the projectors that do not have a trigger output, utilizing instead its power source for the wireless signal. When the projector is turned on, the projection screen will automatically lower and when the projector is off, the projection screen will automatically retract.

Compatible with projectors with any power frequency through the power learning button.

Manual Control

Manual Control On/Off

Standard Voltage Electricity Control

Default composition for all electric screens

Standard Control Switch

Low Voltage Electricity Control

Connect to the "External CTRL" slot on the control interface of the Integrated motorized screen to control the screen.

Central Control Adapter

Low Voltage Electricity Control

Connect to the "External CTRL" slot on the control interface of the Integrated motorized screen to control the screen. Central control and manual switch is built in.
