

Laser projector intelligent telescopic platform

The laser projector intelligent telescopic platform is designed to solve the problem that the ordinary TV counter of the family needs to be away from the wall when playing laser TV. One-key intelligent linkage with ultra-short throw projector, low decibel, stepless limit, industrial HG rail heavy-duty structure, let users feel that technology brings a new and intelligent experience when watching movies and entertainment programs at home.

It is composed of HG industrial linear guide/slider and industrial linear rack/gear, with strong load force, precise tolerance, and stable in long-term operation. Maximum telescopic stroke 260MM

HG Industrial linear guide/slider

Industrial linear rack

Laser projector intelligent telescopic platform

Wireless remote control to adjust the stroke, any position location memory function, synchronized with the projector to turn on and off

- Industrial linear guide/slider, stable in long-term operation
- BMW pearlescent black metal paint surface treatment, elegant texture
- Synchronous camera switch, built-in low-voltage signal switch port, connected to laser projector
- Electronic limit, one key can reach the required moving distance
- Telescopic distance: 0-260mm super long line
- Self-lubricating parts, maintenance-free
- Completely silent operation
- Remote control mode: wireless remote control, DC5-12V trigger
