

Liberty PROJECTOR LIFTS

AK-110

No Circuit board inside the LIFT and directly operates with External Receiver Box & Remote

Motorized Projector Lift with RF remote control

More than 5,000 schools and conference rooms chose us, Why don't you?

Product Features

1. Running distance : 100 cm
2. Loading capacity : 8kg.
3. Accurate positioning: Because this product adopts microwave positioning Scissor style and rare decelerated electromagnetic brake design, which realizes advantages of this product, like operating steadily, positioning, Accurately etc. and its positioning error is controlled within 2mm.
4. Low noise: This product possesses modernized people oriented interior design model, does not exceed 50 db in the process of the mobile running.
5. Centralized control panel: It makes the product more easier to control, via directly butting joint centralized control system, such as "CRESTRON,AMX" etc, to realize the centralized control.
6. Exterior design: elegant appearance, distinctive moulding and imbued with personality.
7. Strong loading capacity: This product not only positions accurately, but also surpasses congeneric product, security coefficient is very high.
8. Owned CE, ROHS certification.

Specifications

Model No.	AK-110
Size	37X35X19 cm
Thickness	21cm
Min height of ceiling	390 mm
Running Distance	1000mm
Motherboard size	500*500cm
Decoration hole size	470*470mm
Loading capacity	8kg
Net weight	20kg
Max dimension of projector	350X360X180mm
Power	10W
Voltage	220v
Color	White
Warranty	1 Year
